

# Chromex Technology Ltd

## Introducing the very latest technology into the world of liquid filling

Chromex Technology offers a broad range of options to meet all budgets from bench/tabletop machines to fully featured automatic multi-head inline equipment.

Originally conceived as our entry level machine, the SP1001 fully embraces our intent to produce the most versatile, cost effective and profitable liquid filling machine available.

The technology inside all our liquid filling machines is the culmination of years of experience designing and developing solutions to meet the daily challenges encountered in the world of liquid filling.

Built around the very latest microprocessor servo controls, the SP1001 delivers superb performance in speed, accuracy and high reliability.

### **SP1001** Servo Benchtop Liquid Filler

#### Features:

- Unique 'Touch to Teach' push button product change
- Clear, easy operation via touch screen HMI
- Fully PLC controlled for future proof upgrades
- Extremely robust construction for long life
- 316 Stainless steel hygienic gearpumps
- 316 Stainless steel positive shut-off filling nozzles
- Continuously rated for filling speeds of 300ml per second
- Infinitely variable fill volumes from 5ml to above 5000ml
- Highly repeatable fill levels typically better than +/- 0.15%
- Designed & Manufactured at our UK Headquarters
- Full Technical Service & Support
